

Project Demo Planning

Date	29 June 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the HDI concept and the need for data-driven socio-economic forecasting for policymakers.	1.5	Surya
2	Architecture & Tech Stack	Explain the 3-tier architecture, highlighting the integration of Flask, HTML/CSS, and Scikit-Learn.	1.5	Teja
3	ML Model & Data Processing	Discuss the UNDP dataset, the Linear Regression training process, and the model's high accuracy ($R^2 = 0.981$).	2.0	Teja
4	Live Application Walkthrough	Screen-share the live Render application, input sample socio-economic metrics, and demonstrate the real-time prediction.	3.0	Surya
5	Deployment & Performance	Showcase the Render cloud hosting setup and briefly discuss the Postman load testing results (sub-second response times).	1.0	Yaswanth
6	Conclusion & Future Scope	Wrap up the presentation and mention planned future features, such as automated PDF report generation.	1.0	Veenela

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Hook the audience by defining HDI and clearly explaining why a machine learning approach improves prediction speed and analytical accuracy over manual calculations.

2	Solution Overview	Briefly walk through the system architecture diagram. Emphasize how decoupling the trained ML model (.pkl) from the Flask routing ensures a scalable and modular backend.
3	Live Feature Demonstration	Run two distinct test cases during the live demo: one representing a highly developed nation and one representing a developing nation. This proves the dynamic updates of the predicted score and tier badge.
4	Q&A Session	Ensure the entire team is unmuted and available to answer technical questions specifically related to their assigned modules (Frontend, Backend, ML Pipeline, or Testing).
